

## Creating a Demographic report

A Demographic report displays the results of state exams broken down by categories you select. For example, you can aggregate scores based on ethnic groups or educational programs. Or you can show overall exam results for your school, grade, class, or entire school district.

You can see each category followed by the number of students (in parentheses) belonging to that category.

### To create a Demographic report:

- 1 Click the **State Analysis** tab. Click the **PDF Reports for Groups and Individuals** link or icon.
- 2 On the Reports page, select the state test you want to run the report on.
- 3 Click the **Demographic Report** link or thumbnail.
- 4 Teachers: Select the beginning pool of students for your report: District, School, or My Classes (allows you to select periods on next page).  
To compare scores for students meeting the same demographic criteria, run the same report but change these initial options. You will have overall scores for the district, school, and your classes for the same set of students.
- 5 On the Select Students for Reports page, update these options, if necessary:
  - Roster. This determines which data source is used when running this report: Test Roster (from state exam) or SIS (from school roster).
  - School (if you have access to more than one)
  - Exam for a given time period (and for certain exams, a date range)
  - Grade level
- 6 In the Select Students Based on area:
  - To run a report without selecting specific students, click **Continue**.
  - To run a report for a specific set of students, use the option links to limit the report results. Then click **Continue**.

## About the TELPAS Demographic report

The Texas English Language Proficiency Assessment System (TELPAS) measures a student’s English proficiency in grades K–12: listening, speaking, writing, and reading. When students achieve an advanced proficiency level on this test, they are no longer required to take it. Texas scales the exam results and divides the scaled scores into proficiency levels.

When you run a Demographic report, Edusoft shows overall scores for the entire set of students you selected. The report also shows aggregate scores for each category of students you included, such as grade level and ethnic group, as well as the distribution of each group across the proficiency levels.

### When would you use this report?

- You might run this report to have a printed copy of your students’ results.
- You might use this report to identify the NCLB groups you need to monitor.
- You might use this report to determine which educational programs are working well.
- You might use this report to check progress on low-performing students in your current class. To do so, run reports on your students’ scores from last year. Then create a custom group made up of those students with low scores, and select the custom group when running reports.

The report options show which schools, grades, etc. you selected for this report.

**Report Options**  
 Schools: O  
 Exams: TEL  
 Rosters: T  
 Teachers: A  
 Grades: All

**Average Comprehension**  
 For all students in this report, this is the average comprehension score, taken from the listening and reading proficiency ratings. The range is from 1.0–4.0.

**Average Composite Score**  
 This is the average composite score, taken from the 4 language area ratings.

**Percent at Each TELPAS Composite Rating**  
 These are the rating levels that your state uses when grouping students' scores. Each level corresponds to a range of scaled scores established for the exam. These percentages show the distribution of the scores across the different levels on the TELPAS.

These are the overall scores for this set of students.

## Overall

### Average RPT Scale Score

This is the average scaled score for the Reading Proficiency Tests in English (RPT) part of the TELPAS. Beginning with grade 3, reading results are tracked in more detail under a separate section. The range for scaled scores differs for each grade and year. (No RPT data for grades K-2).

These are the scores by gender.

## Gender

	# Students	Avg Comprehension	Avg Composite Score	Avg RPT Scale Score	Avg RPT Total Raw Score	Avg RPT Percent Correct

Male	39	2.86	2.75	721.46	43.90	78.44 %

### Average RPT Raw Score/Percent Correct

On the RPT part of the exam, this is the average score for correct answers and the percent of correct answers given by this set of students (not the percentage of students who passed the exam).

These are the scores by ethnicity.

## Ethnicity

### # Students

This is the number of students in each educational program with scores on this exam.

Highlighting indicates the highest number in the row (or in the case of duplicates, the first occurrence of that number). To assess the scores accurately, look at the range of percentages across the row. For example, this row shows that 41% of students in this educational program scored in the Advanced level. However, when you note that 29% scored in Advanced High, the results seem more impressive.
